## Year Six Mock SATs Week!

This week, Yr 6 took their mock SATs tests! The children were put into different classrooms in groups. They were nervous about the tests, but lots of them coped really well under pressure and got very high scores. Lots of children were glad that they did this as they now know how to perform under pressure and what

to do when the day of the SATs comes. The teachers were also pleased with the results of the tests. Sumukh, in Ebony class commented, "I am really glad that we did this as I now understand how to behave in a classroom under test conditions. Also, now I know what I have to work on"

## 😊Riddles!

Q: There is an unexploded bomb. Next to it there is a hairbrush, keys and a phone. When the bomb explodes what item will be destroyed first?

A: The bomb!

A: What kind of fish chases a mouse?

A: A Catfish!

We hope you learn lots from these websites!

## Year 1 and 4 open morning!

This week Yr1 and Yr4 had their open mornings! The parents were very pleased to see what the children learn in lessons and were very impressed by their amazing behaviour. Zariya in Pine Class quoted, "I really enjoyed showing my mum what good work I can do and telling her what topics I enjoy." The parents really enjoyed their visit and really hope that they can have another open morning.

## Artist hatches eggs!

This week, as part of a bizarre project, an artist has hatched eggs! The experiment was to see if a human could do the same job as a chicken and get an egg to hatch. The artist was called Abraham Poincheval, and he sat in a specially made tank for three weeks, using his own body heat to warm the eggs! He was correct and chicks have started hatching! The tank he sat on is now on display as well.
